Bio

Prof. Mary Kathryn Thompson, Ph.D.

Mary Kathryn Thompson is an Associate Professor in the Department of Mechanical Engineering at the Technical University of Denmark. Her research interests include the integration of formal engineering design theories, design thinking, and the design of unique complex systems. Previously, she was an Associate Professor Civil and Environmental Engineering at the Korea Advanced Institute of Science and Technology (KAIST) where she taught Axiomatic Design Theory to over 3000 undergraduate students. Prof. Thompson earned her BS, MS, and PhD in Mechanical Engineering from the Massachusetts Institute of Technology (MIT).
